

The Marbrook Centre

stroke rehabilitation outcomes

The Modified Rivermead Mobility Index assesses functional mobility in gait, balance and transfers, and aims to evaluate the effectiveness of physiotherapy on mobility following stroke.

Modified Rivermead Mobility Index Performance

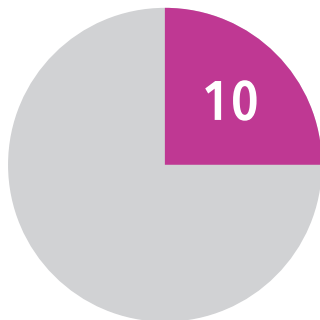

Activities Assessed in the Modified Rivermead Mobility Index

 <p>Turning over in bed</p> <p>score: 0-5</p>	 <p>Lying to sitting</p> <p>score: 0-5</p>	 <p>Sitting balance</p> <p>score: 0-5</p>	 <p>Sitting to standing</p> <p>score: 0-5</p>
 <p>Standing</p> <p>score: 0-5</p>	 <p>Transfers</p> <p>score: 0-5</p>	 <p>Walking Indoors</p> <p>score: 0-5</p>	 <p>Stairs</p> <p>score: 0-5</p>
